

Volvo Buses. Driving quality of life

VOLVO GOLD CONTRACT

A part of Volvo Bus Service Contracts

Secure your uptime

With preventive maintenance and repairs included, you know the exact monthly cost of your bus or coach. The result: carefree ownership and more time to focus on serving your customers.

True uptime

Thanks to Volvo's extensive network and services, and the fact that repairs are scheduled together with you, you get maximum vehicle usage and uptime.

Our certified technicians only use Genuine Volvo Parts and have access to all necessary special tools. This guarantees that your bus or coach is always in the best possible shape when it leaves us.

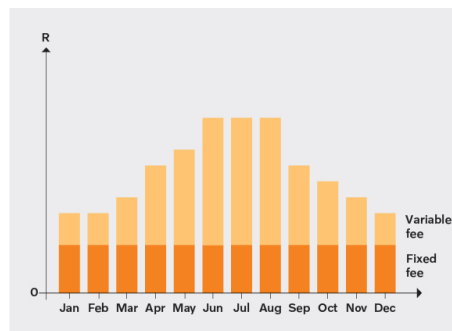

And, when you know the exact cost, the administrative tasks are minimised. We handle all the practicalities, while you enjoy a smoother running vehicle that lowers your total cost of ownership.

Flexi-Gold - Full coverage, flexible fee

The coverage of the Volvo Flexi-Gold Contract is identical to the Gold Contract, but it is designed to match the seasonal pattern of your business. Through a usage-based payment model with a fixed and a variable part, you can align your costs with your revenues.

The Volvo Flexi-Gold Contract uses real-time monitoring technology to monitor and obtain driving data of your vehicle. This enables all your invoices to be based on your actual driven mileage.

The monthly fees vary, thanks to a variable component that follows your actual driving, and offers a $\pm 20\%$ flexibility span estimated on your yearly mileage. You can be assured that no mileage revision will take place at the end of the year.

The monthly fees vary, thanks to a variable component that follows your actual driven distance (price/km).

VOLVO GOLD CONTRACT
