

Volvo Buses. Driving quality of life

# VOLVO SILVER CONTRACT

A part of Volvo Service Contracts

## Driveline repairs and preventive maintenance

Preventive maintenance based on a tailored service plan will increase your bus uptime. Since all driveline components and repairs are covered in the Volvo Silver Contract, you can run your business with better cost control.

### It's great for your bus – and your business

With all work on your bus being done when it suits you, we minimise any disruptions to your operations.

All our technicians are certified, use Genuine Volvo Parts and have access to all specialised equipment, diagnostic tools and the database systems needed. They perform the Volvo Genuine Service operations needed to ensure uptime and functionality and this guarantees that your bus is in great shape when it leaves us.

For you, this saves time and effort – and unforeseen costs are avoided as driveline repairs and expensive components are included. This, and a smoother running bus, lowers your total cost of ownership.

### Features and benefits

- Covers driveline components and repairs
- Covers preventive maintenance
- A service plan tailored to your needs and schedule
- Genuine Volvo Services and Parts – no compromise on quality
- Increased uptime
- The bus is kept in great condition
