

Volvo Buses. Driving quality of life

VOLVO 9900

For your ultimate journey

Designed for LUXURY AND COMFORT

The all-new Volvo 9900 is all about luxury. Your passengers will enjoy travelling in the highest comfort and style, while you benefit from the convenience of a smooth ownership experience. Already from afar the Volvo 9900 radiates attitude, elegance and safety. The premium feel is equally strong on the inside. Superior choice of materials, finely crafted details and trim, comfortable seats, perfect climate, and a very relaxing ambience. A coach for the ultimate journey.

• The Volvo 9900 features powerful headlights
• with integrated signature V-shaped daytime
• running lights. A strong identity carrier.

A new design – beyond styling

The moment you meet the Volvo 9900 you feel this coach is special. The elegance and the attractive details really catch the eye. The distinctive Z-shaped window lines along its sides add a sense of speed and motion. The angle of the lines also resembles the vehicle's inner gradient theatre floor which gives every passenger excellent visibility. Part of the relaxing ambience for an enjoyable journey.

More than meets the eye

A holistic design philosophy is the secret behind the distinctive personality of the new Volvo 9000 range. The Volvo 9900 is designed to express comfort and luxury, but functionality and performance are never compromised. The obvious elegance comes from the fact that everything you see is there for a reason.

Outstanding aerodynamics

The new front of the Volvo 9900 has a distinct and powerful expression. But every single line and surface is part of an aerodynamic masterpiece. An undisturbed flow with a minimum of turbulence results in reduced noise, increased stability and a fuel-saving reduction in air resistance.

Designed for driver performance

Our design fundamentals are also clearly visible in the driver's environment. A pleasantly curved dashboard where everything is in the right place creates a calm and clean space. Together with the new stylish steering wheel and a premium driver's seat it creates a perfect workplace.

For your most demanding passengers

Your passengers expect a premium experience and the new Volvo 9900 will definitely meet their expectations. Excellent comfort, low noise and perfect climate. The coach comes in a choice of three lengths: 12.4, 13.1 or 13.9 m. Let the Volvo 9900 be the new flagship of your fleet.

Supreme passenger comfort

Your most demanding passengers are comfortably seated, surrounded by carefully selected materials and elegant trim in a perfect climate. The Volvo 9900 also offers unique visibility thanks to its sloping window line and the gradient theatre floor.

Driver performance

The all-new driver's environment is a first-class experience. And the unique Volvo Dynamic Steering makes driving a Volvo 9900 a sheer pleasure. Add Driver Alert Support and the driver is alerted if he or she is tired or unfocused.

New front structure

The front structure is now even further enhanced. In the event of a collision the front framework can absorb more energy and covers a wider spectrum of impact angles and heights.

Fuel efficiency

The well-proven Volvo D11K is highly fuel efficient and comes with a choice of two different power outputs. Both with outstanding torque and driveability.

Uptime

Your coach's uptime is the key to profitability. With Volvo you have a range of services, keeping your coach on the road and adding to your productivity.

Connected to your coach

Through Volvo Connect you have access to our connected services. With your new Volvo coach, you will get our free Volvo Connect smartphone app, providing brief weekly fleet reports for all your new coaches.

Keep your coach CONNECTED

Connectivity is nothing less than a productivity revolution. With accurate validated data, uptime and maintenance planning can be optimised like never before. And when you take delivery of your new coach, the Volvo Connect smartphone app is included.

Vehicle Status

This service provides on-demand, real-time information about your vehicle's health. In your office, on-line, you can monitor important parameters such as all yellow and red warnings in the driver's display. Which makes it a lot easier to take decisions and support the driver.

Fleet Reports

When you sign up for fleet reports you can monitor a wide range of vehicle and driving data. Distance, time, speed, rpm, weight, idling, coolant temperature, door status, engine hours, and more. All presented in clear and concise reports, a valuable help to find wear and excess fuel consumption factors.

Safety Zones

With Safety Zones you can set a maximum speed for the coach, within a defined geographical area. When entering the zone, the driver is alerted on the dashboard and the coach automatically adopts the maximum speed setting.

I-Coaching and Coaching Zones

I-Coaching is a clever device which gives the driver instant feedback on driving performance. Over-revving, idling, overspeed as well as harsh braking, acceleration and cornering are monitored. And when you add Coaching Zones you set limits for those parameters in defined geographical areas.

The Volvo Connect smartphone app provides regular reports for your new Volvo coaches. It gives you a clear overview of vehicle and fleet parameters such as fuel economy, emissions, idling, average speed and distance.

Easier to buy, own and drive with **VOLVO BUS CARE**

Volvo Bus Care is our new business offer. It integrates products, services and financing in new and smarter ways. You will benefit from minimised administration, improved uptime and potentially higher residual value with a coach that has been properly looked after.

The business upside

Volvo Bus Care is developed for one reason only – your productivity. The offer includes our best coaches ever, with equipment, services and financing tailored for you. In fact, you don't even have to own your coach. You can focus on driving your business and let us take care of the rest. The result is simplified ownership and a highly competitive lifecycle cost.

Keeping it simple

Volvo Bus Care makes purchasing and owning easy. It's easy to specify your new coach, and to tailor it with our smart packages. Volvo Bus Care also means simplified administration. Your daily business gets a lot easier, and with the included Volvo Connect App you're always up to speed on your fleet's performance.

1

Choose your coach

Which configuration, equipment and comfort level best suit your operation?

2

Select packages

Choose from a range of packages with smart combinations of services and features.

3

Maximise uptime

With a Volvo service contract and Vehicle Status, uptime is optimised and costs are known in advance.

4

Choose your finance and insurance solution

For Volvo Bus Care, Volvo Financial Services has tailored attractive solutions for your coach fleet.

PASSENGER SATISFACTION

Your passengers’ FIRST CHOICE

A unique interior

This is the coach for the most demanding passengers. They are comfortably seated, surrounded by carefully selected materials, elegant trim and harmonic colour schemes. The Volvo 9900 offers unique visibility thanks to its sloping window line and the gradient theatre floor. A perfect climate and a premium, versatile infotainment system complete the coach your passengers would choose for their perfect journey.

Your favourite seat

The seats in the Volvo 9900 are our most comfortable ever. Ergonomic design and a wide range of adjustments ensure everyone can find a perfect seating position. The overhead compartment, concealed by convenient hatches, is finished with elegant trim to enhance the premium feel.

Passenger comfort package

Add these details to enhance both comfort and convenience. Features: individual air outlets and lights, hatches for luggage racks, pleated curtains, removable mats under seats, on seat platforms and in luggage compartment.

Media package

Add that extra edge with our media package. Wi-Fi, subwoofer, flip-down 19" screens, USB socket in passenger seats and road camera.

IN VOLVO SAFETY

Relax in VOLVO SAFETY

Every day millions of people around the world rely on our vehicles, and our job is to bring them safely to their destination. So our vision is clear: zero accidents with Volvo Group products.

Safety always comes first at Volvo Buses. It's a core value and has been our guiding star since 1927. Already back then Volvo's founders stated that "Safety is, and must be, the basic principle in all design work".

A new structure for improved safety

The new integral structure gives safer and more stable handling, thanks to a lower centre of gravity. The front structure also substantially increases absorption of collision energy, thus improving safety for drivers, passengers and other road users. Other safety features are enhanced driver visibility and advanced support systems – examples of how we have improved both active and protective safety.

Create your own Safety Zones

With Volvo's unique Safety Zones, you can enhance overall safety for the driver, passengers and other road users. This service allows you to define geographical areas or roads and set a maximum speed for the coach. When entering the zone, the driver is alerted on the dashboard and the coach automatically adopts the maximum speed setting. For example in city centres, at terminals, in depots or along dangerous motorway sections.

Safety package

With our safety package you can offer your passengers top-level safety and security. It includes tyre pressure monitoring, reversing camera, camera at second door, fire suppression, anti-theft alarm and the Safety Zones service.

Visibility package

The visibility package will give your drivers a clearer view with bi-Xenon lights, static cornering lights and lighting above the second door.

DRIVING IN STYLE

Superior driver ergonomics

Take your seat in the all-new driver environment and you feel it right away: the clean layout, curved around you to support an ergonomic working environment. Enjoy the elegant trim, the leather steering wheel and the perfectly suspended seat for a truly premium experience. And with I-Coaching and Coaching Zones you will also drive more economically and comfortably.

Advanced driver assistance

Superior safety is integrated into every aspect of the new Volvo 9900. Advanced driver support systems help the driver prevent accidents. The unique Volvo Dynamic Steering (VDS), increases stability at higher speeds. The new Driver Alert Support senses if you are distracted and signals if it's time for a break.

Efficiency package

Save up to 10% of fuel. This package includes Dynamic Chassis Lowering, I-See and I-Coaching. It also includes Fleet Reports, Coaching Zones and Efficient Driving Training.

Driver comfort package

Step up in driver comfort and convenience. This package includes enhancements such as driver resting compartment, fridge in dashboard, safety box/waste box for driver and central locking.

Driver performance package

Invest in driver performance. Adaptive Cruise Control, Volvo Dynamic Steering (VDS), heated and electrically operated rear-view mirrors, a 230 V voltage converter and the time-saving remote tacho download service.

FACTS AND FIGURES

Dimensions and weights

Model	2-axle	3-axle	3-axle
Length (m)	12.4	13.1	13.9
Width (m)	2.55	2.55	2.55
Height (m)	3.85	3.85	3.85
Permitted GVW (kg)	19,500	26,500	26,500

Passenger capacity

No. of seats (3*)	49	53	57
No. of seats (4*)	–	48	52
Passenger seats	Volvo coach seats, available in two comfort levels with a variety of options to suit individual needs. Optional: Child seats and booster cushion.		

Luggage capacity

Max. luggage volume incl. luggage racks; model with WC (m³)	11.5	12.3	14.9
---	------	------	------

Powertrain

Emission standard	Euro 6
Engine	Volvo D11K, 6-cylinder in-line diesel engine with common rail injection.
Output (hp)	430 or 460
Torque (Nm)	2050 or 2200
Transmission	Volvo I-Shift, automated gear-changing system with integrated retarder. Gearbox oil heater available as option.

Tanks

Diesel (L)	480 or 600
AdBlue (L)	64

Axles, suspension and steering

Front axle	Volvo IFS
Rear axle	Volvo's single reduction axle with optimised ratios.
Suspension	Electronically controlled air suspension with kneeling function. Dynamic Chassis Lowering available as option.
Power steering	Hydraulic power steering. Volvo Dynamic Steering available as option.
Tyres	295/80 R22.5", 315/80 R22.5"
Rims	Steel or aluminium rims available.

Climate system

Zones	Separate climate zones for driver and passengers.
Ventilation and heating	Powerful roof unit with cooling and heating.
AC max (kW)	32 or 36

Brakes

Collision Warning with Emergency Brake (CW-EB). Volvo electronically controlled disc brakes (EBS) and Electronic Stability Program (ESP). Volvo Engine Brake (VEB) and Brake Blending function.

Driver's environment

Spacious driver's environment with wide range of individual adjustments for outstanding ergonomics and comfort. Instrument cluster with enhanced HMI.

• The Volvo 9900 comes with engine ratings of 430 or 460 hp, and the I-Shift transmission gives the perfect combination of smooth ride and high average speed.

• A driveline with proven fuel efficiency.
